ADVANTAGE OF FOAM

Contact Time maximizes chemistry's effectiveness

Visual marker for equipment operator

Expansion rates reduce water and chemical usage

Reduced Labor costs

Pump-up Foamer

The Pump-up Foamer technology provides innovative spot cleaning and sanitation solutions for the industrial and institutional markets. Patented dual tube technology draws the chemical and compressed air from the tank into separate tubes creating thick foam when mixed at the trigger foam wand. Flow in the air tube is controlled by a needle valve giving the user the ability to control the consistency of the foam.

FOAM-IT Pump-Up

SPECIFICATIONS

Dual polyurethane tubing
Adjustable needle valve for foam control
Glass filled Polypro foam wand
6515 fan tip for increased foam coverage
1, 2 or 3 gallon capacity
viton seals in pump mechanism

ADVANTAGES

Contact time of foam enhances the effectiveness of product
Foam provides visual identification marker
Environmentally friendly by reducing aerosol usage
One gallon of product = 20 gallons of foam
