Modec's Chemical Agent Training Simulant is commercially manufactured under its license with the U.S. Army Edgewood Chemical Biological Center

MODEC

WMD Training Simulants

ATTRIBUTES:

Modec's chemical training Simulants are designed to provide realistic surrogates for the world's most dangerous chemicals.

- Innocuous material that is safe to use
- Excellent simulant agent liquid and vapor property correlation
- Easy to confirm visually using fluorescent whitening agent to show the extent of liquid contamination present
- Vapor signature detection by several chemical agent detection technologies
- Actual chemical reaction simulating neutralization occurring between the simulant and the decontaminant.

PATENTED TECHNOLOGY:

The Chemical Agent Training Simulant Composition was developed by the US Army Edgewood Chemical Biological Center and patented under US Patents No.'s 6,566,138 B1 and 7,129,094 B1.

PATENT LICENSE:

Modec has executed a Patent License Agreement with the US Army Edgewood Chemical Biological Center for the patented Chemical Agent Training Simulant developed under PLA 0702P.
